PART ONE

Too many is the time where I have been asked to roll up a higher level character, yet the age charts only show dice rolls for starting ages. Also as a GM, have I needed ages for NPCs. So I created the following chart for random determination of ages. The following chart should be used as following;

Example: I want to roll up a hill dwarf.....the first set would give me ages 13-156 yrs of age. But the second set would give me the ages between 15-300 yrs of age.

When I lived in Guam I was for a short time a vendor for a line of womens hair dyes. But when I saw my inventory sheet I reliezed that every hair color was listed upon it and used the oppertunity to create a random hair chart simmlar to the eye chart for my PCs and NPCs.
